*** ANNOUNCEMENT ***

--File 515 D&B Dun's Electronic Business Directory is now online completely updated and redesigned. For details, see HELP NEWS 515.

--File 990 - NewsRoom now contains May 2002 to present records.
File 993 - NewsRoom archive contains 2002 records from January 2002-April 2002. To search all 2002 records, BEGIN 990,993 or B NEWS2002.

--Alerts have been enhanced to allow a single Alert profile to be stored and run against multiple files. Duplicate removal is available across files and for up to 12 months. The Alert may be run according to the file's update frequency or according to a custom calendar-based schedule. There are no additional prices for these enhanced features. See HELP ALERT for more information.

--U.S. Patents Fulltext (File 654) has been redesigned with new search and display features. See HELP NEWS 654 for information.

--Connect Time joins DialUnits as pricing options on Dialog. See HELP CONNECT for information.

--CLAIMS/US Patents (Files 340,341, 942) have been enhanced with both application and grant publication level in a single record. See HELP NEWS 340 for information.

--SourceOne patents are now delivered to your email inbox as PDF replacing TIFF delivery. See HELP SOURCE1 for more information.

--Important news for public and academic libraries. See HELP LIBRARY for more information.

--Important Notice to Freelance Authors--
See HELP FREELANCE for more information

For information about the access to file 43 please see Help News43.

Emerging value propositions for M-commerce

Clarke, Irvine III

Journal of Business Strategies vl8n2 PP: 133-148 Fall 2001 ISSN:
0887-2058 JRNL CODE: JBST

WORD COUNT: 5192

ABSTRACT: The proliferation of mobile **Internet** devices is creating an unparalleled opportunity for e-commerce to leverage the benefits of mobility. Mobile e-commerce, commonly referred to as m-commerce, is the ability to purchase goods anywhere through a **wireless Internet**-enabled device. Current e-commerce providers, engaged through mobile devices, will find advantage in developing unique m-commerce value propositions founded upon the specific dimensions of. ubiquity, convenience, localization, and personalization. A consumer orientation that provides value-for-time functions to create a new value curve may achieve a competitive advantage over traditional e-commerce models replicated for mobile business. Therefore, this paper investigates the value propositions, that engender a productive mobile e-commerce strategy to provide **recommendations** for managerial decision-making in this emerging **wireless** environment.

Integration gives utilities an edge

Mediate, Joe

American Gas v82n5 PP: A10-A11 Jun 2000 ISSN: 1043-0652 JRNL CODE: GAS
WORD COUNT: 2424

ABSTRACT: Deregulation, mergers and acquisitions, and higher customer expectations are fueling a new trend in energy: integrating systems to enhance effectiveness and service levels at lower costs. The most important technology for utilities to leverage is the World Wide Web. Increases in customer service levels and decreases in costs will come from use of well-integrated applications that effectively use the Web to allow more rapid implementation of new business processes. Mobile workforce management software connects, optimizes, and integrates the data from many different information technology systems.

Technology infusion in service encounters

Bitner, Mary Jo; Brown, Stephen W; Meuter, Matthew L
Academy of Marketing Science. Journal v28n1 PP: 138-149 Winter 2000
ISSN: 0092-0703 JRNL CODE: AMK
WORD COUNT: 9184

ABSTRACT: Service encounters are critical in all industries, including those that have not been traditionally defined as service industries. The increasing deployment of technology is altering the essence of service encounters formerly anchored in a "low-tech, high-touch" paradigm. A study explores the changing nature of service, with an emphasis on how encounters can be improved through the effective use of technology.

Top 50 U.S. marketing/ad/opinion research firms profiled

Anonymous
Marketing News v31n12 PP: H2-H7+ Jun 9, 1997 ISSN: 0025-3790
JRNL CODE: MNW
WORD COUNT: 15771

ABSTRACT: America's 50 leading marketing/advertising/public opinion research organizations, according to the 24th Annual Industry Review, are briefly profiled. Top-ranked ACNielsen Corp. had 1996 revenues of \$1.359 billion, up 6% from 1995. In 1996, 78.9% of revenues, or \$1.07 billion, was from outside the US.

Star ratings

Anonymous

Macworld v13n9 PP: 189-201 Sep 1996 ISSN: 0741-8647 JRNL CODE: MAW
WORD COUNT: 9736

ABSTRACT: Macworld magazine's Star Ratings compares Macintosh products based on the authoritative assessments in reviews and features. The number of stars indicates the product's level of quality; each product also gets a numeric score that provides a more exact assessment of the product's quality within that level. Seven factors are evaluated to derive the Star Rating: 1. feature set, 2. design implementation, 3. performance, 4. reliability, 5. ease of use, 6. innovation, and 7. value. A list of software and hardware products with their Star Ratings is included.

What do service providers really want?

Johnson, Mona

Telephony v230n9 PP: 36-41 Feb 26, 1996 ISSN: 0040-2656 JRNL CODE: TPH
WORD COUNT: 2683

ABSTRACT: In the long term, service providers envision architectures that will allow scalability and high performance, plus integration with existing and future operations support services. Ideally, the architectures will be open to allow multiple vendors and solutions. In the short term, however, competitive pressures in many market segments are too intense for service providers to focus on long-term architectural requirements. Instead, they are emphasizing non-architectural features as a cost-effective way to bring differentiating services to market. To maximize the number of differentiating services a provider can offer from a single platform, platform vendors need to work closely with development partners. The ultimate way to encourage developers to use a vendor's platform is to open the application programming interface. Leasing and revenue sharing are 2 types of flexible financing that assist service providers in cost-justifying platform development.

Wireless World '95 Exposition coverage

Anonymous

Cellular Business v12n12 PP: 56-104 Nov 1995 ISSN: 0741-6520
JRNL CODE: CLB
WORD COUNT: 17304

ABSTRACT: On November 7, 1995, the Moscone Center (San Francisco, California) will play host to the **wireless** industry's premier fall event, the **Wireless** World Conference & Exposition. A brief profile of each of the companies that are exhibiting at this year's conference, program information, and a map of the show floor for quick reference are presented.

ABSTRACT: Analysts are betting on Bluetooth technology to power the development of an economically viable RF (radio frequency) personal area network (PAN). Bluetooth's low power consumption and cost supposedly make it ideal for embedding into cell phones and PDAs. Bluetooth support, it has been claimed, will add only \$5 to the price of a device. The problem, however, is that Bluetooth has been plagued by numerous delays. Meanwhile the IEEE 802.11b standard for **wireless** LAN equipment is being used in many **wireless** networks. The two standards will not necessarily compete, however, since each tends to be associated with a distinct function.

ABSTRACT: Six mapping software packages for personal trip planning are reviewed. AAA Map'n'Go 6.0, sold by DeLorme, is a fairly powerful research tool that combines maps with detailed, rated listings of lodgings, restaurants, campgrounds and attractions culled from AAA TourBook guides and exit service reports. The package has street-level data only for 241 urban areas and no comprehensive address database, although it does support **GPS** devices and the **Palm** OS. TravRoute's Door-to-Door 2000 Deluxe can download and run program segments on Windows CE handhelds to recalculate routes in-car and has a good set of maps but an unintuitive interface. Microsoft Streets & Trips 2001 adds street-level data for Canada, **GPS** support, database hard drive installation and **GPS** support to an already powerful product and earns an Editors Choice rating. DeLorme's Street Atlas USA 8.0 has sophisticated routing and is more comprehensive than previous versions. Rand McNally's StreetFinder Deluxe 2000 is aimed at business

travelers but can be used for leisure as well; door-to-door directions are limited. Its sibling product, TripMaker Deluxe 2000, has many resources, guides and road-trip tools for recreational travelers.

ABSTRACT: Business travelers who spend much of their time on the road and need an outstanding laptop computer. For them, a system built around an Intel Mobile Pentium II/400 chip is recommended. Other components might include a 4MB 2-D/3-D graphics subsystem, a 14- or 15-inch TFT display, 64MB to 128MB of RAM, an internal 56.6K V.90 modem, a 10GB to 14GB hard disk, built-in stereo speakers, a 4X DVD or a 24X CD-ROM drive, and a Type III PC Card slot.

ABSTRACT: The effective use of technology can help companies respond to market demands more quickly and effectively, which results in greater success. Companies first need to find untapped markets by researching the competition in public databases and by visiting competitors' Web sites. Companies also need to promote their offerings effectively via marketing videos, fax broadcasting, interactive presentations on CD or by hosting an online forum, newsgroup or chat session. Customer responses generated by these methods should be promptly answered. Customers should also have no

difficulty accessing a company, which may require the installation of a voice-mail service, multiple mailboxes or the use of pagers. Companies should advertise actively with full-page ads in trade publications, large ads in the yellow pages and by placing an ad at a Web site prospects are likely to frequent.

DOCUMENT TYPE: Evaluation ISSN: 0888-8507 LANGUAGE: English

RECORD TYPE: Fulltext; Abstract

WORD COUNT: 12031 LINE COUNT: 00915

ABSTRACT: Six ISDN adapters are evaluated: Adtran Inc's \$595 ISU Express, ISDN*tek Inc's \$495 CyberSpace **Internet** +Plus Card, Mitsubishi Electronics America's \$349 NetViper, Motorola Information Systems Group's \$495 BitSurfr Pro, 3Com Corp's \$795 3Com Impact, and U.S. Robotics Inc's \$549 Sportster ISDN 128K. Many analysts claim ISDN will be usurped very soon by such technologies as direct broadcast satellite, cable modems, and Asymmetric Digital Subscriber Line (ADSL), all of which provide faster and less expensive connections. It is likely that ISDN will be the transmission medium of choice through 1997, and probably into 1998, for connections to the **Internet** or to LAN routers: it is more flexible than ADSL and cable modems, and it is currently available. The editors' choices are the BitSurfr Pro and the Sportster ISDN 128K: the former is the easiest to install and configure; and the latter is an internal card, so it is not limited by the 115.2-Kbps maximum throughput of the serial port.

VB strategies '95: coming to grips with the component-based development paradigm. (Microsoft's Visual Basic) (Desktop DBMS) (Column) (Tutorial)

Spitzer, Tom

DBMS, v8, n7, p97(3)

June, 1995

DOCUMENT TYPE: Column Tutorial ISSN: 1041-5173 LANGUAGE: ENGLISH

RECORD TYPE: FULLTEXT; ABSTRACT

WORD COUNT: 2770 LINE COUNT: 00222

ABSTRACT: Microsoft's Visual Basic (VB) is a popular tool for developing client/server applications, in part because of the popularity of Windows, which pressured MIS to provide Windows-based access to corporate data. The VB pricing model fit well into the corporate budgeting model, and many programmers already had some background in Basic, which made them more inclined to try VB. A market soon arose for products and information supporting VB development, which Microsoft helped nurture by providing the VBX custom control mechanism for extending VB. Examples are provided of organizations using VB: the Medical Bureau of Economics Inc service bureau created a Medicaid billing system using VB 3.0; a professor at Southwest Missouri State University developed a program for easy access to US census data; Golden Gate Software created an application for migrating applications from Paradox while continuing to use Paradox for queries and reports; and CH2M Hill Inc developed a program for time-and-expense billing. Approaches to VB application development are examined.

ABSTRACT:
Analysts are betting on Bluetooth technology to power the development of an economically viable RF (radio frequency) personal area network (PAN). Bluetooth's low power consumption and cost supposedly make it ideal for embedding into cell phones and PDAs. Bluetooth support, it has been claimed, will add only \$5 to the price of a device. The problem, however, is that Bluetooth has been plagued by numerous delays. Meanwhile the IEEE 802.11b standard for **wireless** LAN equipment is being used in many **wireless** networks. The two standards will not necessarily compete, however, since each tends to be associated with a distinct function.

ABSTRACT:

Six mapping software packages for personal trip planning are reviewed. AAA Map'n'Go 6.0, sold by DeLorme, is a fairly powerful research tool that combines maps with detailed, rated listings of lodgings, restaurants, campgrounds and attractions culled from AAA TourBook guides and exit service reports. The package has street-level data only for 241 urban areas and no comprehensive address database, although it does support GPS devices and the Palm OS. TravRoute's Door-to-Door 2000 Deluxe can download and run program segments on Windows CE handhelds to recalculate routes in-car and has a good set of maps but an unintuitive interface. Microsoft Streets & Trips 2001 adds street-level data for Canada, GPS support, database hard drive installation and GPS support to an already powerful product and earns an Editors Choice rating. DeLorme's Street Atlas USA 8.0 has sophisticated routing and is more comprehensive than previous versions. Rand McNally's StreetFinder Deluxe 2000 is aimed at business travelers but can be used for leisure as well; door-to-door directions are limited. Its sibling product, TripMaker Deluxe 2000, has many resources, guides and road-trip tools for recreational travelers.

ABSTRACT: Analysts are betting on Bluetooth technology to power the development of an economically viable RF (radio frequency) personal area network (PAN). Bluetooth's low power consumption and cost supposedly make it ideal for embedding into cell phones and PDAs. Bluetooth support, it has been claimed, will add only \$5 to the price of a device. The problem, however, is that Bluetooth has been plagued by numerous delays. Meanwhile the IEEE 802.11b standard for **wireless** LAN equipment is being used in many **wireless** networks. The two standards will not necessarily compete, however, since each tends to be associated with a distinct function.

WORD COUNT: 2955 LINE COUNT: 00255

ABSTRACT: Telecommunication carriers generally look for technical innovations that will enhance their service offerings in the long term as well as practical features that enable implementation as soon as possible when purchasing intelligent peripherals and network service nodes. To date, requirements include fault tolerance, scalability, standards compliance, interoperability and a single service creation environment for different network elements. These are expected to push the market for intelligent offerings from expected \$191 million in 1996 to \$294 million in 1997.

DOCUMENT TYPE: Evaluation ISSN: 0199-6649 LANGUAGE: ENGLISH

RECORD TYPE: FULLTEXT; ABSTRACT

WORD COUNT: 13371 LINE COUNT: 01044

ABSTRACT: Alias Research Inc's Alias Sketch 2.0, Ray Dream Inc's Ray Dream Designer for Power Macintosh 3.1 and for Windows 3.0, Asymetrix Corp's 3D F/X and Caligari Corp's trueSpace2 are each strong 3-D software illustration programs that cost less than \$1,000. Caligari's \$795 trueSpace2 tested best of the 3-D products, offering an excellent Windows alternative to workstation- or DOS-based systems. Its elegant 'natural' interface incorporates all the options and tools into one screen. The program includes a full-feature 3-D modeler, renderer and animator and features fast image rendering. Alias Sketch 2.0 costs \$695 and features the highest-rated rendering engine of the programs tested. Ray Dream Designer for Power Macintosh 3.1 and for Windows 3.0 offer the best balance of functionality, price, speed and rendering quality. Both versions are priced at \$349, but the Power Mac version is faster at image rendering. Asymetrix 3D F/X was the least expensive of those tested at \$99, but is aimed at the occasional user.

Bell Mobility Investments provides \$750,000 in R&D funding to NERTEC Design Inc. & Sanchez Computer Associates

CANADA NEWSWIRE

October 29, 2002

JOURNAL CODE: WCNW LANGUAGE: English RECORD TYPE: FULLTEXT

WORD COUNT: 1716

NERTEC Design Inc. to create **wireless** real-time energy pricing and consumption information service; Sanchez Computer Associates to create secure mobile access to Sanchez Wealthware(TM) software. TORONTO, Oct. 29 /CNW/ - Bell Mobility Investments (BMI), a \$30 million corporate venture company created in 2001 by BCE and Bell Mobility, today announced strategic R&D funding agreements with Granby, Quebec-based NERTEC Design Inc. and Sanchez Computer Associates' Toronto-based Wealth Management Division for new **wireless** applications. The investment comes from BMI's R&D Accelerator Fund, which supports working partnerships between BMI and companies seeking to bring **wireless** innovative products and services to the marketplace. BMI will invest \$500,000 in NERTEC, a North American leader in the design and implementation of Automated Meter Reading (AMR) services. NERTEC will integrate **wireless** communication modules with Bell Mobility's 1X **wireless** network to create a real-time automated energy meter reading service compatible with all major meter brands. Businesses will now be able to read and monitor their meters wirelessly in real time and adjust their energy consumption to take advantage of the best rates. "This is a very timely partnership for Bell Mobility Investments," said BMI President and CEO Ted Maksimowski. "With the shift to market-based energy pricing throughout North America, there is a growing need for real-time data on pricing so energy consumers have the choice to adjust consumption patterns and reduce costs." "We are proud of BMI's confidence in NERTEC," said Guy Lemieux, President and CEO of NERTEC. "Our customers require innovative solutions that can give them the data they need, when they need it, and at a competitive price. This partnership will help in delivering exactly that." BMI will also invest \$250,000 to support the development of secure, mobile **wireless** access to Sanchez Wealthware(TM), an integrated wealth management software solution from Sanchez Computer Associates. Mobile access to Sanchez Wealthware(TM) will offer financial institutions secure **wireless** access to everything they need to provide timely, high quality service to advisors and investors. This solution combines market data with decision support tools to drive financial transactions. The mobile Wealthware solution will demonstrate the responsiveness, bandwidth and reliability of Bell Mobility's 1X network. "BMI and Bell Mobility are partnering with Sanchez to set the benchmark for always-on mobile wealth management solutions," Maksimowski said. "This Canadian-led R&D effort will benefit from Sanchez's expertise in the development and delivery of financial services applications, and BMI's deep technical and marketing experience in the **wireless** arena. Our partnership with Sanchez reflects BMI's belief in the product, the market and the Sanchez Wealthware team." "Sanchez and BMI are both focused on helping financial institutions deliver a competitive advantage to their advisors and investors," said John McLeod, president, Sanchez Wealth Management. "In today's volatile markets, advisors must stay tuned in to the market at all times and communicate relevant information to their clients on a timely basis to make investment decisions. Sanchez's mobile Wealthware will allow advisors to economically deliver personalized service to more clients in less time by ensuring their investors stay abreast of events that may impact their investments - from the office, home, or on the road." BMI invests in early stage technology companies developing services and applications to run on Bell Mobility's next generation **wireless** networks through an equity fund and a R&D Accelerator fund. BMI supports these companies through cash investments and

valuable operational support, including access to Bell Mobility's nation-wide customers testing facilities and networks BMI and Bell Mobility have invested more than \$20 million in developing and delivering **wireless Internet** and data products and services in 25 companies. BMI has a further \$30 million available for minority equity investments and R&D project financing. Consult the BMI web site at www.bell.ca/bmi for more information. BMI is actively seeking out investment and R&D funding opportunities, with a specific focus on platforms, applications and services for consumers and enterprises. Some of BMI's current focus areas include **location** based services, gaming and entertainment, mobile commerce, and other services which leverage the advantages of Bell Mobility's new 1X network. BMI's R&D Accelerator Fund allows emerging and established firms with an early, pre-commercialized product idea to receive product development capital without diluting existing firm ownership. BMI does not take an equity position in R&D partners but receives a return upon successful sales of the product. Partner companies gain access to the Bell Mobility **wireless** network, the largest in Canada with more than 4.3 million subscribers, as well as to the substantial technical and marketing support of the company. About Bell Mobility Bell Mobility, a division of Bell Canada, provides a complete range of innovative **wireless** communications solutions: PCS and cellular, web-browsing and data, two-way messaging, paging and airline passenger communications services. Bell Canada, Canada's national leader for communications in the **Internet** world, provides connectivity to residential and business customers through wired and **wireless** voice and data communications, high speed and **wireless Internet** access, IP-broadband services, e-business solutions, local and long distance phone and directory services. Bell Canada is owned by BCE Inc. of Montr Deal. For more information please visit www.bell.ca

About NERTEC Design Inc. NERTEC Design Inc. (NERTEC) is headquartered in Granby, Quebec, Canada. Founded in 1985, NERTEC is a leader in the development, design, and manufacture of Automated Meter Reading products and services. NERTEC **offers** off-the-shelf and **custom** solutions for electric, gas, water, and propane utilities for residential, commercial, and industrial applications. NERTEC has offices in Quebec, Massachusetts, Minnesota, Texas, and Washington. For more information, visit NERTEC's web site at www.nertec.com

About Sanchez Computer Associates Sanchez Computer Associates Inc. (Nasdaq: SCAI) is a global leader in developing and marketing scalable and integrated software and services that provide banking, customer integration, brokerage, wealth management and outsourcing solutions to approximately 400 financial institutions in 21 countries. Sanchez Wealthware(TM) delivers investor management, market data management, order, and information management capabilities to brokers and their investors. Sanchez corporate headquarters is located in Malvern, Pa. The company's outsourcing data and operations service center, Sanchez Data Systems Inc., is located in Seven Fields, Pa., and the Sanchez Wealth Management Division is headquartered in Toronto, Canada. For more information, visit www.sanchez.com.

NERTEC BACKGROUNDER The growing trend throughout North America toward open markets in electricity and natural gas makes the NERTEC-BMI partnership to create real-time energy consumption and pricing information extremely timely. Because energy costs can vary substantially depending on the volume and time of day the energy is needed, commercial and industrial companies will be able to use energy consumption data to make smart energy buying decisions. Customers and utilities will have access to real-time data through the **Internet**. Commercial and industrial customers will have the potential to gain significant cost savings by adjusting consumption patterns to take advantage of price fluctuations. The power of the 1X network, the first phase of 3rd generation networks, combined with NERTEC's automated meter reading (AMR) applications for commercial and industrial customers, will ensure NERTEC and Bell Mobility stay at the forefront of the industry. With the 1X-AMR devices, their meters will have always-on data connection capability. The agreement will also allow NERTEC to further develop its **Internet** capabilities. Initially, the product will be offered to commercial and industrial customers, but will eventually be available to household consumers. Bell Mobility's 1X network will provide utilities with enhanced coverage of their customer networks and also allow the utility to save on meter reading costs. Sanchez Computer Associates Backgrounder Bell Mobility

Investments is partnering with Sanchez Computer Associates Inc.'s Wealth Management Division, to develop secure, mobile access to Sanchez Wealthware(TM), an integrated wealth management software solution. BMI's investment, from its Research and Development Accelerator Fund program, will support integration of three best-in-class components: Bell Mobility's newly launched Audiovox Thera device, the Bell Mobility high speed 1X **wireless** network and the Sanchez Wealthware wealth management solution set. The Sanchez mobile wealth management solution includes a decision-support tool that combines market data with critical account, position, and transaction information. Real-time market data - including quotes and news for equities, options and indices - will be delivered to advisors and investors via **wireless** devices. The combination of the advanced Bell Mobility's 1X network and mobile access to Sanchez Wealthware will allow advisors to collaborate with their clients via a **wireless** network based on the same consolidated view of information. A real-time alert engine will provide "actionable" alerts to facilitate event-driven service. Once notified of an alert, advisors can determine which clients hold the security and send them an email **recommending** an action. Bell's increased 1X network provides always-on connectivity and faster **wireless** data speed (up to 86 kbps) demanded by customers. The speed also will enable Sanchez to deliver Wealthware(TM) to **wireless** devices with the same appearance and full-featured functionality as on a desktop. Sanchez's mobile wealth management solution will initially provide device-neutral, rich-media applications for both desktop and mobile browsers, such as the Bell Mobility Audiovox Thera(TM) 1x **PDA**. BMI and Sanchez will also develop a JAVA version specially built for selected devices. The **wireless** wealth management offerings will be marketed to financial institutions globally. This news release may contain forward-looking statements about Sanchez, its wealth management division, and/or Sanchez Data Systems Inc., which is an operating unit of Sanchez, and may include, without limitation, statements concerning Sanchez's expectations that may impact the company's performance. ABSTRACT:

Analysts are betting on Bluetooth technology to power the development of an economically viable RF (radio frequency) personal area network (PAN). Bluetooth's low power consumption and cost supposedly make it ideal for embedding into cell phones and PDAs. Bluetooth support, it has been claimed, will add only \$5 to the price of a device. The problem, however, is that Bluetooth has been plagued by numerous delays. Meanwhile the IEEE 802.11b standard for **wireless** LAN equipment is being used in many **wireless** networks. The two standards will not necessarily compete, however, since each tends to be associated with a distinct function.
